

HaaS (Hardware as a Service)

HaaS – Simplifying Technology

Do you shudder at the cost of your next major computer network upgrade? Do you feel like your IT spending is out of control? What if you could trim your technology costs, increase your working capital and upgrade your hardware at the same time? Well, you can... with Digerati Group's HaaS (Hardware as a Service)!

Why Hardware as a Service?

For many companies, affording and maintaining their business' computer and network hardware in-house is a huge challenge. In addition to the initial capital investment and the resources involved, costs are incurred for constant upgrades as technology evolves and changes. At Digerati Group, we have the solution: HaaS (Hardware as a Service), which provides you with a complete hardware solution at a predictable and affordable monthly rate.

Our HaaS solutions give your business a unique way to pay for the use of technology as a monthly service instead of a capital expense. What's more, our HaaS program includes the ongoing maintenance and support that your business needs to stay profitable, competitive, efficient, and productive. This service will seamlessly scale with your business' growth and future needs.

Proactive 24x7x365 Monitoring and Maintenance

Our Network Operations Center (NOC) will proactively monitor your HaaS devices for successful connectivity and operation. When a problem is detected by our sophisticated monitoring software, the NOC is immediately alerted and will begin to perform remediation activities to address the issue. This prevents the loss of valuable time, especially in the event of a disaster in which data must be recovered or restored. As a result of this proactive approach, valuable system uptime and productivity is maximized and costly downtime is minimized.

Want More Time? More Capital?

Without having to divert time and energy to hardware procurement, management and replacement, your business will have more time and working capital to devote to key revenue-generation activities. And who doesn't want more time and money?

Contact us at (312) 360-1900 to learn more about Haas (Hardware as a Service) or SaaS (Software as a Service) options.

Reduce Capital Expenditures

Complete hardware solution that includes full maintenance and support with no initial required capital expenditure.

Affordable Monthly Cost

Affordable fixed monthly rate includes: full hardware management and maintenance with unlimited remote and onsite support and no additional software to purchase or licenses to manage.

Maximize Uptime & Productivity

Minimize downtime, while maximizing productivity by utilizing the latest technologies and a proactive approach offered with the HaaS managed services.

Best-of-Breed Hardware Solutions

At Digerati Group, we chose strategic infrastructure partners very carefully, selecting only those we can trust with our most precious assets: our reputation and our client's critical systems. They are the industry's "Best-of-Breed" solutions. Our strategic hardware partners include: HP, Cisco, and Barracuda Networks.

Flexible, Scalable

When your company grows, so must your infrastructure at an even faster rate. With HaaS, all solutions can be deployed rapidly and easily to meet the needs of your business.

Never Be Obsolete

Our HaaS offering provides the ability to keep up with "next-generation" technology by offering regular hardware upgrade options. Hardware refreshes every 3 years ensuring it will never be obsolete.

24x7x365 Monitoring & Management

All hardware devices are proactively monitored and managed 24x7x365 by our Network Operations Center (NOC).

Comprehensive Warranty

Provides a full warranty for the repair or replacement of defective parts and hardware.
