

Message Archiver

Capture & Preserve Email. Simplify Management. Reduce Costs.

As a complete and affordable email archiving solution, the Support+ Message Archiver is designed to effectively index and preserve all emails, achieve legal and regulatory compliance needs, and make more efficient and cost-effective use of storage technology inside the IT organization.

Simple, Compliant

Today's businesses have an enormous dependency on emails for maintaining audit trails and records, and therefore generating tremendous volumes of email data. As a result, analysts estimate that 80 percent of a company's intellectual property is contained in its email. Government and industry regulations, as well as protection in the event of litigation require that business email content be archived for future review or investigations. Failing to properly archive and manage business-critical content can be damaging to your business. On the other hand, retaining and managing these vast quantities of email is no small task and can be complex, not to mention costly.

Safe, Secure and Cost Effective

Support+ Message Archiver securely, easily, and efficiently manages email storage by providing fast, easy search and retrieval capability while reducing storage costs and enabling e-discovery and compliance with data retention regulations. Our archiving solution lowers email storage costs by reducing data on the mail server by as much as 80 percent. The tamper-proof archiving solution allows authorized personnel to search and retrieve emails and attachments quickly throughout an organization.

Our **Support+ Message Archiver** solution is designed to keep your email content safe, secure and easily accessible, and most importantly provide you freedom from concerns of compliance and litigation. It is a powerful, cost-efficient message archiving, monitoring and retrieval solution that is flexible, scalable and dependable.

Reduce Storage Costs, Increase Email Server Efficiency

Single-instance storage and message compression reduces email storage costs. Additionally, email storage and backup size is reduced by offloading messages from the email server and as a result significantly increases the operational efficiency.

Easy Search & Retrieval

Automatically stores and indexes all email messages and attachments in real-time, while making them immediately available for rapid searching and retrieval. An easy-to-use web interface is featured, as well as an Outlook integration for quick and seamless access to the search function.

Compliant with Regulatory & Litigation Requirements

Retains every email, relieving the liability of having users decide what to archive, while preventing employees from inadvertently or intentionally deleting emails which might be needed later for evidence or audit purposes. Also enables eDiscovery for litigation requests and compliance with data retention regulations.

Policy Management

Advanced rule and policy creation capabilities allow for enhanced monitoring of compliance and corporate policy and guidelines. Administrators are immediately notified of all policy violations.

Affordable, Cost Effective

Affordable monthly rate includes full management and support, with no hardware, software or per user licenses to purchase, install or manage.

Secure & Encrypted

Delivers granular, yet tamper-resistant user access and policy definitions, while providing controlled access to prevent users from accessing emails other than their own. Secure storage using industry standard encryption technologies.

Scalable

Scalable to any size for as many users as needed.
