

Hosted SharePoint

Organize your team and give them everything they need in one data management and collaboration solution.

In today's information economy, companies realize more than ever that people are their most important asset. Companies also understand that having a communication and collaboration solution that helps their people work better and more efficiently together is essential. Finding the right solution, however, can be a challenge.

SharePoint lets you improve productivity with collaborative tools. As your organization grows, the number of files you have will increase exponentially, and it can become difficult to keep track of all of your documents. With SharePoint you can keep your files in a central location that can be accessed easily and quickly by team members, regardless of where they might be working from. It provides access control and revision control for documents. Teams and individuals are enabled to connect and collaborate together.

Connect Knowledge and People

Support+ Hosted SharePoint is a solution that provides a single, integrated location that is always-available and accessible via web browser where employees can efficiently collaborate with team members to share documents, project plans, ideas, contacts, announcement, calendars and much more. SharePoint can be deployed rapidly while providing easy-to-use, customizable site templates designed to meet the needs and workflow of each team across the organization. It enables effective communication and collaboration, especially for project-based organizations, mobile workforces, and multi-location offices.

Manage Content Effectively and Safely

Hosted SharePoint is an effective tool for people and teams to stay on task with a variety of communication features such as announcements, sophisticated alerts, surveys and discussion boards that let users know when actions are required or important changes are made. Documents can be easily authored and managed while maintaining the document's integrity. Enhanced features include the option to require document check-out before editing, the ability to view past revisions and restore to previous versions, and the ability to set document-specific security controls.

Support+ Hosted SharePoint gives you the business benefits of a web-based collaboration tool combined with the availability and security of an enterprise solution.

Increased Efficiency Anywhere, Anytime

Give your team an online space to stay connected across organizational and geographic boundaries and collaborate easily and effectively from anywhere and at any time.

Easy & Effective Collaboration

Add content to task lists, document libraries, event calendars, discussion boards and more from one central location. Easily share, manage, and edit this data and assign specific read/write privileges per individual.

Content Management & Control

Provides document versioning controls to help eliminate confusion. Allows multiple contributors to update the same file and easily keep track of all the changes in one document, or revert back to previous versions if needed.

Improved Internal Communication

Automate your current business processes with SharePoint's powerful workflow functionality. Alerts ensure that your employees stay on top of every aspect of their day-to-day tasks and processes.

Customizable Site Templates

Select from various site layout templates to meet the needs of your team. Customizable views and features include built-in themes for a quick and easy site design.

Reduced IT Costs

Reduce IT costs with no hardware or software to purchase, no licenses to manage and a flexible month-to-month billing schedule with no long term commitments.

Seamless Scalability

When your company grows, so must your infrastructure at an even faster rate. Our infrastructure and resources allow for additional resources to be deployed rapidly and easily to meet the needs of your organization.

Enhanced Security

The use of HTTPS provides secure Internet access. Also, our data centers are protected by strict physical and systems security measures and redundancy.

Guaranteed Reliability

Digerati Group's servers are hosted in state-of-the-art data centers, utilizing advanced server virtualization technology to ensure maximum uptime and business continuity. 99.9% uptime is guaranteed.
